

Jobsite

Do you have experience as a Site Manager on international projects worldwide? Are you motivated by the challenge of leading large-scale and complex projects in wind energy, marine construction, and immersed tunnels? Then our opportunity is your next career move!

Job Description

As the International Site Manager Wind, Marine & Immersed Tunnels at Ballast Nedam, you will oversee day-to-day operations on national and international project sites. You are responsible for the successful execution of our projects, ensuring they are completed on time, meet quality standards, and adhere to safety regulations. With your experience, leadership, and organizational skills, you will inspire the team, foster collaboration, and ensure smooth operations. Your contribution is essential to achieving project goals. You understand better than anyone that in this high-stakes industry, failure is not an option.

You will not only coordinate and manage internal teams and site personnel but also oversee local subcontractors at project sites worldwide. Together with the planning team, you will develop detailed project schedules and methodologies and ensure strict adherence to them. You will monitor progress, identify potential bottlenecks, deviations, or opportunities for optimization, and implement solutions effectively. Additionally, you will handle the contractual and administrative aspects of the projects and maintain strong relationships with stakeholders, including project management, inspectors, suppliers, and subcontractors.

Above all, you ensure safety on the construction site and work according to our high integrity standards. You will coach and motivate your team members, fostering their professional growth within the framework of our HR policies.

This role takes place in an international context: you will frequently travel to project sites worldwide and collaborate with partners and teams from various cultures.

Profile

- Bachelor's degree in Civil Engineering;
- 7 to 10 years of experience as a project manager at a bachelor's level;
- Proven experience managing internal teams and local contractors;
- Resilient, decisive, and capable of performing under pressure.

We Offer You

- Competitive salary paid 13 times per year (every 4 weeks);
- Attractive secondary benefits under the construction & infrastructure CLA, including 30 vacation days and an individual budget;
- Excellent conditions for working abroad;
- Opportunities for professional and personal development through training;
- A challenging international work environment with projects around the globe in wind energy, marine structures, and immersed tunnels.

About Ballast Nedam

Ballast Nedam Infra delivers large-scale, complex infrastructure projects, including the construction and expansion of ports and bridges, tunnel development, and road widening. This is achieved through the knowledge and expertise of our versatile employees. Collaboration is key to each project. Every tunnel, bridge, or road expansion requires a specific solution and seamless integration into the environment. By fostering strong collaboration, we deliver comprehensive solutions.

Ballast Nedam is a Dutch construction and development company with international influences. We focus on people and results. With dedication, we work alongside our partners to build a sustainable living environment. Every day, we challenge ourselves to improve. This means creating added value for our clients and enhancing the well-being of our environment. We are open-minded, eager to learn, and committed to building genuine connections. Our unique way of working ensures the delivery of exceptional projects in the Netherlands and abroad. Safety, sustainability, digitalization, and corporate responsibility are at the core of our operations.

We Look Forward to Hearing from You!
