

Jobsite

Are you an experienced project manager with a passion for large-scale international projects in wind energy, marine construction, and immersed tunnels? Do you want to work on innovative global projects and make a sustainable impact? Then our challenge is your playing field!

Job Description

As an International Project Manager Wind, Marine & Immersed Tunnels at Ballast Nedam, you are responsible for the preparation and execution of diverse and dynamic international projects. You ensure that all projects meet quality standards, schedules, and budgets. With your independence and sense of responsibility, you lead complex projects from start to completion, contributing to the success and continuity of our company. Precision in contract management and follow-up with clients is second nature to you. You understand better than anyone that failure is not an option in this field.

You are involved in the entire process, from acquisition to execution. You play a central role in determining cost estimates, feasibility, and alternatives, set goals, assign responsibilities, and monitor both schedules and budgets. You build and maintain a strong stakeholder network and ensure clear communication and reporting on project progress. Additionally, you manage local subcontractors and foster effective collaboration with them to ensure projects run smoothly. Safety, integrity, and sustainable outcomes are always at the core of your work ethic.

This role operates in an international context: you will travel regularly to project sites worldwide and collaborate with partners and teams from diverse cultures.

Profile

- A completed bachelor's or master's degree in Civil Engineering;
- 10 to 15 years of experience as a project manager at a bachelor's or master's level;
- Strong communication skills and the ability to manage stakeholders and local contractors effectively;
- A strong sense of responsibility and the ability to work independently.

We Offer You

- A competitive salary paid 13 times per year (every 4 weeks), depending on your knowledge and experience;
- Excellent secondary benefits in line with the construction & infrastructure CLA, including 30 vacation days, an individual budget, an excellent pension, and more;
- Attractive conditions for working abroad;
- Opportunities for training and personal development;
- An international and dynamic work environment where you can make an impact on large-scale projects around the world.

About Ballast Nedam

Ballast Nedam Infra delivers large, complex infrastructure projects, including the construction and expansion of ports, bridges, tunnels, and road widening. This is achieved through the knowledge and expertise of our versatile employees. Collaboration is at the heart of every project. Each tunnel, bridge, or road expansion requires a unique solution and integration into its environment. Strong collaboration allows us to deliver comprehensive solutions.

Ballast Nedam is a Dutch construction and development company with international influences. We focus on people and results. With dedication, we work alongside our partners to build a sustainable living environment. Every day, we challenge ourselves to improve. This means creating added value for our clients and enhancing the well-being of our environment. We are open-minded, eager to learn, and committed to building genuine connections. Our unique way of working ensures the delivery of exceptional projects in the Netherlands and abroad. Safety, sustainability, digitalization, and corporate responsibility are at the heart of everything we do.

We Look Forward to Hearing from You!
